

Ibrahim Zeidan

ibrahimzeidan09@gmail.com | +96171326652 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Professional Summary

Motivated full-stack developer experienced with the **MERN stack**, Next.js, and FastAPI. Skilled in building RESTful APIs, integrating databases, and implementing authentication systems. Passionate about developing scalable, user-friendly applications.

Professional Experience

Full-Stack Web Development Intern, Digital Hub UNRWA

Jan 2026 – Present

- **Architected AI Systems:** Leveraged LangChain, AI Agents, and MCP servers to build advanced retrieval systems, significantly optimizing hybrid search techniques.
- **Full-Stack Development:** Engineered scalable applications using React/Next.js and NestJS/Express.js, managing complex logic across both MERN and PERN stacks.
- **Backend & Data Logic:** Developed robust services with Node.js and Python, focusing on high-performance data processing and seamless API integration within PostgreSQL and MongoDB
- **DevOps & Automation:** Streamlined deployment by building CI/CD pipelines with GitHub Actions, ensuring automated validation for both frontend and backend systems.
- **Code Quality & Strategy:** Applied SOLID principles and design patterns (Repository, Factory) to improve maintainability while collaborating in Agile/Scrum environments via Jira.

Professional Wedding and Video Clip Videographer

Jun 2022 - Present

- Filmed professional wedding and music video clips.
- Specialized in drone videography capturing landscapes, mountains, and diverse outdoor locations.

Project Experience

Real State– Smart Agriculture Platform GitHub [real-state](#)

March 2026

- Built a full-stack real estate app using **Next.js** and **MongoDB**, with dynamic routing and API integration for property listings.
- Developed responsive, SEO-optimized pages ensuring fast performance and smooth user experience.
- Connected frontend and backend for efficient data fetching and database operations (Digital Hub training project).

MERN Stack Group Project GitHub [Mern Stack](#)

Feb 2026

- Developed a React frontend for a MERN project, integrating REST APIs, implementing CRUD features, and managing state for consistent UI.
- Collaborated with a team using Git to deliver responsive components and meet backend requirements.

Service-App – Mobile Application GitHub [ServiceApp](#)

April 2025

- Contributed to a Flutter-based mobile application by developing responsive UI, implementing key features, and collaborating with a team using GitHub and backend integration.

Education

B.S. in Computer Science | Beirut Arab University | Beirut, Lebanon

Dec 2025

Skills

- Languages: Python, JavaScript, TypeScript, PHP, SQL, Java, C++.
- Backend & Architecture: NestJS, FastAPI, Express.js, Node.js, Django, RESTful API Design.
- Frontend & UI: React, Next.js, Tailwind CSS, HTML5/CSS3.
- Databases & Tools: PostgreSQL, MongoDB, MySQL, Git, Docker, Postman, Slack, Jira, Agile/Scrum.
- Languages :Arabic (Native), English (Fluent).
