PROFILE

Computer Science graduate with a solid background in programming, software development, and problem-solving. Skilled in Python, Java, and web technologies, and eager to apply my knowledge in a professional tech environment.

Projects

Agri-connect project

2024-2025

Agri-Connect is a smart agriculture platform designed to help landowners make informed decisions by analyzing weather data, pest alerts, and crop health news. Built with Python and Django, it fetches real-time data and sends daily alerts with tailored advice to improve plant care and reduce risk.

Service -App Project

2024-2025

Built a Flutter-based front end for a university team project (ServiceApp). Collaborated with team members using GitHub for version control and project coordination. Focused on creating responsive UI components and implementing core app features. Worked alongside backend integration to ensure a smooth user experience.

EDUCATION

Bachelor of computer science in Bierut arab university

2023-2026

I have completed my Bachelor's degree in Computer Science, where I developed a strong foundation in programming, software development, and problem-solving. During my studies, I worked on several projects, including Agri-Connect, and gained practical experience in building real-world applications.
